

## **UNITED STATES ENVIRONMENTAL PROTECTION AGENCY REGION 4**

**Science and Ecosystem Support Division  
Enforcement and Investigations Branch  
980 College Station Road  
Athens, Georgia 30605-2720**

With your concurrence, the panel will utilize the following questions to supplement resume information and better determine the technical and leadership capabilities of the candidates:

1. This position is a technical authority, GS-13. What specific water quality expertise and knowledge do you possess that directly supports WPD/SESD projects and customers?
2. Describe a challenge you faced as a field team leader and how you overcame that challenge.
3. What leadership skills do you possess that make you or would make you effective in dealing with highly technical, multi-disciplinary teams as well as Regional customers and communities?

4. Describe your experience managing complex water quality projects independently, from planning, coordination, and logistics to data interpretation and reporting.
5. Describe your experience and specific examples of situations where you have mentored or supported other staff.
6. Describe an event where you briefed management on an important project/report/issue and the recommendations you provided.
7. Is there any other information you would like to share not covered by these questions?
